```

```
chip one: 1
```

```
flop chip array: [4, 5, 6]
```

```
chip? five: array[1]
```

```
straddle chip add (chip: a, chip: b) $.
```

```
    cashout a + b
```

```
.$
```

```
reveal add(one, five)
```

for-loop.ps

rude Example of a nested for loop

```
chip winnings: 0
```

```
playingLoose (chip x: 0, x <= 10, x+$) $.  
| playingLoose (chip y: 0, y < 20, y+$) $.  
|   winnings incrementBy 5  
|. $  
|. $
```

rude Example for an if-else statement

```
chip total: 12
```

```
excuses total <= 15 $.  
|   reveal "I'm not doing well..."  
|. $ followingExcuses total > 20 $.  
|   reveal "Big money"  
|. $ followingExcuses miss $.  
|   reveal "How did I get here?"  
|. $ noMoreExcuses $.  
|   reveal "Let's keep going!"  
|. $
```

if-else.ps
